Subject: RichText over an image background - weird scroll (on windows)

Hi,

I've a popup with a background image (painted in Paint() routine) with over a couple of RichTextCtrl with no background, so
I can see the popup background image.
Allo ok, up to I scroll the RichText content; on Linux (GTK) is all ok, on windows the background image gets scrolled
weirdly too, as in the attached gif.
Is there a workaround ?

Edit : I noticed that if I select the text with mouse, the background gets repainted correctly.

Try this:

```
void Scroller::Scroll(Ctrl& p, const Rect& rc, Point newpos, Size cellsize)
{
 if(!IsNull(psb) && !p.IsTransparent()) {
  Point d = psb - newpos;
  p.ScrollView(rc, d.x * cellsize.cx, d.y * cellsize.cy);
 }
 else
  p.Refresh();
 psb = newpos;
}
```

If it does not help, I will need a testcase...

That said, I think I will remove/depreacete all scrolling support soon (GPUs are fast enough)

Mirek
