## Subject: TreeCtrl - How to expand all?
Posted by alexe100 on Sat, 12 Jan 2019 17:57:12 GMT

Hi!

I have a TreeCtrl filled with parent and leaf nodes. I would like to see it completely expanded when app starts.
How to do that?

Thank you

Alex

Hi

Check in Help for TreeCtrl

you can use
void OpenDeep(int id, bool open = true)
Opens/closes item with id and all of its child items.

Call it after you finish adding Tree nodes
