Title tells most of it... For the next release I decided to ship some libraries with Win32 release so that it all works instantly out of box. In addition to SDL2, I also plan PGSQL and MYSQL client libraries to ship with U++.

Also I have added a little sound demo to examples...

Hi Mirek,
Quote:For the next release I decided to ship some libraries with Win32 release so that it all works instantly out of box. In addition to SDL2, I also plan PGSQL and MYSQL client libraries to ship with U++.

Very good news indeed
