Hi
I have de need to add new ico images to Ctrl.iml so I am thining to implement a converter .ico -> .txt (with iml section format)

Where can I get iml format? where can I find the TheIDE iml editor source code?

Thanks

Alex

I would recommend .ico -> .png (that should be possible with common tools), then you can directly load to .iml.

Anyway, to answer your question:

uppsrc\IconDes\ImlFile.cpp

png is ok for me!
Where is described the process to import png into iml files? How to do that?

Thanks

Alex

Alex

Right click the list of images, "Insert from file(s).."

P.S.: Based on this, I have just improved iml designer so that it can now import .ico files directly (should be in nightly build tomorrow).
