Subject: Windows Cert store with Upp::HttpRequest and Core/SSL
Posted by Xemuth on Thu, 07 Feb 2019 14:44:52 GMT

Hello everyone,

I'm looking to send some Certificate signing request with Upp.
But the cert I got is stored in my windows session certificate storage.
So the question is :
Is it possible with Upp to easily make an CSR based on certificate stored on windows Cert Store ?

Thanks in advance
