Hi. I want put a button in the right-buttom of the window but it doesn't work. I follow the examples on the web page but it continues not to work. Here is the code

```
#include <CtrlLib/CtrlLib.h>

struct App : public TopWindow{
 bool list_numbers;
 Button botao_sair;

 void Click(){
  PromptOK("O programa vai ser encerrado!");
  Exit();
 }
 virtual void Paint(Draw& w) {
        w.DrawRect(GetSize(), SBlack);
        w.DrawText(20, 20, "Isto ainda nao esta como eu quero!!!!", Arial(22), White);
    }
 void Exit(){
  Close();
 }
 void List_Numbers(){
  list_numbers=!list_numbers;
 }
 void show(int i){
  PromptOK(AsString(i));
 }
 void draw(Bar& bar){
  for(int i=0;i<10;i++)
   bar.Add(AsString(i), THISBACK1(show,i));
 }
 void opcoes(Bar& bar){
  bar.Add("Mostrar numeros", THISBACK(List_Numbers))
     .Check(list_numbers);
  if(list_numbers==true)
   bar.Add("Lista :", THISBACK(draw));
  bar.Add("Sair", THISBACK(Exit)).Key(K_CTRL_Q);
 }
 void Menu1(Bar& bar){
  bar.Add("Opcoes",THISBACK(opcoes));
 }

 MenuBar Opcoes;

 typedef App CLASSNAME;
```

```
 App(){
       list_numbers = false;
Add(botao_sair.RightPos(10, 100).BottomPos(10,20));//HERE!!!!
       botao_sair.SetLabel("Sair");
       AddFrame(Opcoes);
       Opcoes.Set(THISBACK(Menu1));
       botao_sair<<=THISBACK(Click);
   }
};

GUI_APP_MAIN
{
 //App().SetRect(0,0,50,50);
    App().Title("My first GUI").Sizeable().Run();

}
```

Well i think that i don't understand how .LeftPos(), TopPos(), RightPos() and BottomPos() work. If you can explain me and see why this happen in my code i will be thankful.
Thanks all.

I've run your code and I got a button in the right-bottom side of the window. It seems to work. Why you say it doesn't work, what do you want to achieve?

Luigi

Well i think that i don't understand how .LeftPos(), TopPos(), RightPos() and BottomPos() work. If you can explain me and see why this happen in my code i will be thankful.
Thanks all.

What if you try to imagine PosFromLeft, PosFromRight etc...? It helps for me...
