Hi to everybody....

is there an easy manner to play a sound??? with a library?? or without???

i need to complete my programs....do you have some fresh code???wav,mp3,ogg,aiff????

i have tryed either in mac and windows...but nothing works...about sounds.....sorry i'm a newbie...

i thank you a lot in advance....Lestroso

Hi fasasoftware,

I only used sound once to play some wav extracts and I simply used the system command and a player

Here is a sample code used in linux:

```
void MyPLayerUtilityClass::playFileCB(String file)
{
    String cmd("pkill aplay"); // to be sure to stop other sample already playing
    DoSystemCall(cmd.Begin());
    cmd = "aplay ";
    cmd += file;
    cmd += " &";
    DoSystemCall(cmd.Begin());
}
```

```
playSoundButton <<= THISBACK1(playFileCB, "path/MySample.wav");
```
