Any idea why?

```
void set_tradelist_oolumns ( ArrayCtrl & ac )
{
    ac.AddColumn ( "Ticket", t_ ( "Ticket" ) ).Sorting();
    ac.AddColumn ( t_ ( "Time" ) ).Sorting();
    ac.AddColumn ( t_ ( "Symbol" ) ).Sorting();
    ac.AddColumn ( t_ ( "Type" ) ).Sorting().SetConvert ( Single<MyOrderTypeConvert>() );
    ac.AddColumn ( t_ ( "Size" ) ).Sorting().HeaderTab().AlignRight();
    ac.AddColumn ( t_ ( "Price" ) ).Sorting().HeaderTab().AlignRight();
    ac.AddColumn ( t_ ( "Swap" ) ).Sorting().HeaderTab().AlignRight();
    ac.AddColumn ( t_ ( "Profit" ) ).Sorting().HeaderTab().AlignRight();
    // ac.AddColumn ( t_ ( "Equity" ) ).Sorting();
    ac.AddColumn ( t_ ( "Balance" ) ).Sorting().HeaderTab().AlignRight();
    // ac.AddColumn ( t_ ( "Max drawdown" ) ).Sorting();
    // ac.AddColumn ( t_ ( "Date of max drawdown" ) ).Sorting();
    ac.ColumnWidths ( "1 4 3 2 2 2 2 2" );
}
```

It works for me.

Maybe the problem is that this is alignment of header tab and you expect it to align the content - it does not work that way...

You need to provide SetDisplay for the column (or for the individual cell) to align the content right.

E.g. StdRightDisplay.

```
GUI_APP_MAIN
{
    ArrayCtrl ac;
    ac.AddColumn("Aligned right").SetDisplay(StdRightDisplay());
    ac.Add(123);

    TopWindow win;
    win.Add(ac.SizePos());
    win.Run();
}
```
