Sorry, for my bad English, I'm not an English speaker.

in ToolButton.cpp line 156

```
ToolButton& ToolButton::Kind(int _kind)
{
    if(kind != _kind)
        Refresh();
    return *this;
}
```

I think that must be like this

```
ToolButton& ToolButton::Kind(int _kind)
{
    if(kind != _kind) {
        kind = _kind;
        Refresh();
    }
    return *this;
}
```
