Hi all-

My exe files are like 45 MB with  
Debug build. Is that normal?

I am worried there is injection  
Malware.

My projects are really small like  
Just a basic core with U++  
and SQLITE plugins

Thanks roboloki

It is normal. Debug info takes a lot of space.

Release builds are smaller, ~2MB for basics, my biggest app has 20MB though. But that is around  
200K lines (in addition to U++)

Hi mirek

That is very cool. I can stop worrying now.  
U++ will be the highlight of my 3 day weekend.

Thnx

Roboloki
