When compiling with NOAPPSQL, an ifdef is missing from Session.cpp.

Patch [against 2019.1]:

```
@@ -139,10 +139,12 @@ void SqlSession::PerThread(bool b)
{
    sPerThread = b;
}
#endif

+#ifndef NOAPPSQL
+
void Sql::operator=(SqlSession& s)
{
    Mutex::Lock __ (sDefs);
    if(this == &AppCursor()) {
        #ifdef _MULTITHREADED
@@ -210,6 +212,8 @@ Sql& AppCursorR()
    empty = &h;
}
return *empty;
}

+#endif
+
}
```

This is bad in current master / trunk also.
