When compiling in TheIDE (W10), if the TheIDE window is minimized, if after the compiling the window is maximized, warnings appear in vertical, like if a \n would be added after every letter.

:)
The warnings are right, although the console messages are like this:

Well, that is as expected...

The problem is I "format" lines too soon, which at the point has zero width...

This was just a quick patch, correct fix would require a lot of changes.

Thank you, do not worry. For me the fix in the warning list was much more necessary.
