How do I change TabCtrl tab size (height).

I can enlarge the tab label font size (with e.g. `tab.Add("\1 [[4!Arial! Test]]");`) but the tab remains the same height and the font is drawn too high.

I am increasing the size of my app controls for fat fingers on tablets.

Thanks.

You can define your own Style, change tabheight.

```
GUI_APP_MAIN
{
    static TabCtrl::Style big_tab = TabCtrl::StyleDefault();
    ONCELOCK {
        big_tab.tabheight = Zy(100);
    }

    TopWindow win;
    TabCtrl tab;
    tab.SetStyle(big_tab);
    tab.Add("Test");
    win.Add(tab.SizePos());
    win.Run();
}
```

(Note that Style has to be static or global).

Alternatively, you can do that for all TabCtrls:

```
GUI_APP_MAIN
{
    TabCtrl::Style& s = TabCtrl::StyleDefault().Write();
    s.tabheight = Zy(100);

    TopWindow win;
```

```
TabCtrl tab;  
tab.Add("Test");  
win.Add(tab.SizePos());  
win.Run();  
}
```

Hi Mirek,

That did the job.

Many thanks.
