I haven't tested on Linux and with MINGW. So, please test.

It seems the package 'nImage' is missing in the archive.

I'll try it this afternoon. Is it running under stable 605 or someother version?

Matthias

You should have "nImage" in uppsrc...

You should have "nlImage" in uppsrc...

I have release 605 installed and I can't find 'nlImage' in uppsrc.

Which version do you use?

I have release 605 installed and I can't find 'nlImage' in uppsrc.

Which version do you use?

Matthias

Because I like to experiment a lot I use my very own mixed versions... . If you don't have nlImage you can download from the post above.

nImage was package used to develop new Image. Since B605 version, what was in nImage is now integrated in regular Draw.

You should have "nImage" in uppsrc...

I've put nImage package in uppsrc. Then the other two packages are now in MyApp.s. This is what I get with a stable 605 and mingw:

In file included from C:\upp\uppsrc\nImage\Image.h:227,

from C:\upp\uppsrc\nImage\Image.cpp:1,

from C:\upp/out/nImage/MINGW.Debug.Gui/\$blitz.cpp:3:

C:\upp\uppsrc\nImage\Raster.h:64: error: expected `,' or `...' before '&&' token

C:\upp\uppsrc\nImage\Raster.h:65: error: expected `,' or `...' before '&&' token

In file included from C:\upp/out/nImage/MINGW.Debug.Gui/\$blitz.cpp:19:

C:\upp\uppsrc/Draw/Draw.h: In constructor `NewImageDraw::NewImageDraw(Size)':

C:\upp\uppsrc/Draw/Draw.h:389: error: `Draw::Draw()' is protected

C:\upp\uppsrc\nImage\ImageWin32.cpp:312: error: within this context

C:\upp\uppsrc/Draw/Draw.h: In constructor `NewImageDraw::NewImageDraw(int, int)':

C:\upp\uppsrc/Draw/Draw.h:389: error: `Draw::Draw()' is protected

C:\upp\uppsrc\nImage\ImageWin32.cpp:318: error: within this context

In file included from C:\upp/out/nImage/MINGW.Debug.Gui/\$blitz.cpp:23:

C:\upp\uppsrc\nImage\RasterFormat.cpp: At global scope:

C:\upp\uppsrc\nImage\RasterFormat.cpp:118: error: expected `,' or `...' before '&&' token

C:\upp\uppsrc\nImage\RasterFormat.cpp: In static member function `static void

RasterFormat::TailBits(RGBA\*, const by

I guess my agg package should work with any pre-new-image Draw. That means before B605? Luigi, have you tried with MSC?

I've removed every track of MSC on my computer. One day, perhaps, I'll try again to install this 1 gigabyte compiler. I think too the problem is the compiler and include. Let's wait what other users will report.

Luigi

Luigi

Why on earth did you want the 8th version? MSC7.1 works very well and you don't need 1 gigabyte... If are you saving space you can e.g. remove from 600MB SDK - 200Mb help files, 100Mb samples, 150MB mfc libs... What is left? 150MB! You can strip it more if you are not using 64bit and win95 stuff....

64bit and win95 stuff....

The link on the microsoft show me only the 8th version. Please indicate me the link of the 7.1 version.

Today I had the courage to download again the version 8. It works .

My program from 2.6 Mb passed to 1.75. Even the agg-aris application works. Now I must study the upp graphics.

If you have upp version (>=B505) with the new upp Image integrated (I've tested 606dev1 with MSC and MINGW) upp you can draw my agg image like this:

```
//aggImg(600,400).Paint(w, 50, 50);  
w.DrawImage(50,50, aggImg(600,400));
```
