## Subject: [SOLVED] Dual GICtrl in one frame? Posted by Xemuth on Mon, 23 Dec 2019 03:11:01 GMT

View Forum Message <> Reply to Message

Hello,

Today I tried to put 2 GICtrl in one Frame. It's working but the second GICtrl is not refreshing properly.

I have to perma-resize the Window to make refresh the second.

Here you can take a look of what I'm saying: https://imgur.com/a/D0tsFNV

Is it normal? How Can I fix this? (I don't think that overwriting Paint method could be the solution)

Thanks in advance

Well, the fastest way to fix this is to provide a testcase:)

I will check and either tell you what is wrong with your code, or (more likely) will fix GICtrl.

Thanks,

Mirek

While I was writing a simple test case It seems to work so I must have done bad code first time. Sorry for the bad Call.

If some people wonder how I did the test, you can find the testcase below.

Thanks,

Have a good day

Xemuth
