There is software programming, but - have you ever heard about mind programming?
Unfortunatelly a big problem nowadays worldwide - although some know about this - some don't.

What is it?
Well - it's probably the biggest subject on earth, but
In short - it's mostly using someone whole mind/head - it's nervous system/body to literally
wirelessly programm someone,
eg driving someone like a doll - which one version of it is psychic driving - eg using remote
controller to affect someone's mind/motorics.
There are 3types of mind programming: passive, active and direct(like one would programm a
computer/car for example - not for one's with bad nerves).
For this - some created brain-comptuer-interface(BCI) - eg nano implant/etc - so that one can be
either used as a mind tool via help of radio/other frequencies/etc.
There are many reasons why someone become a part of this - but usually it's about
psyEnergeticExploitation/opression/etc - eg things that are somehow meant to become a part of
someone's life - are redirected to psyExploiters/brainwashers/mindProgrammers.
I call it the sport for "higher rase".

One that is a part of this circus is usually called targeted individual - and completelly all knowledge
of neuralEngineering and other methods are abUsed in this.

Many of us are a part of it - that's why some swear while they try to code - because many unusual
things happen when one is a part of active mind programming - eg feeling like one would be under
electroshocks etc. No - this is not some medical problem - it's known symptom of mind
programming abuse.

Why do i write abuse? because this is in itself neutral - although nowadays probably covertly
mostly used - like in the old days, when some corrupted satanists needed "victims" to test some
things.

It's a big subject per se - although it's roots are from covert psychological experimentation.
One of such thing is traumaBased monarchMindProgramming(usually in early years - worst
psychologicalExperimentation) - some that went throug it remember - some don't. This can be
searched on net.

This is mentioned here - because most know about programming - although there is less knowing
about mind programming abuse.
How to test if one is a part of it(because many are and are not aware of it).
Usually - one has a little bit more radioFrequencies in one's body that usually - one can check with
rfMeter, but there are probably more methods to check this - if one knows something about this - it
would be welcome to add to this post.

~~~~~~~~~

And the second part of this message,
testing how frequencies affects our health - creating a list of this for info.
A sample and readme is in attachment - 1st test of 2.45GHz - which is wifi.
Personally i don't want to be cooked because of too much rfRadiation(some places have higher values - some lower), and i use a cable for internet instead of wifi for quite some time now - a cable also usually offer better quality.

ahh, i forgot to mention this somewhere.
When adding symptoms to list - one should also specify if he/she was (nano)implanted with:
yes/no/maybe/probably.
As i remember - many kids were around and before 1980 nanoImplanted for "psychological experimentations", which is bollocks, this is nowadays used for pure psyEnergyExploitations.

If one makes such list, it can post it here in this post or on email.
