Added:
- template class LRUCache
- Assist++: popup now allows to select type (of hierarchy)

Modified:
- Font/text metrics Draw decoupling:

Draw::GetFontInfo is recplaced with Font::Info
GetTextSize are global function

- Prompts now fixed to visually match Win32 prompts

Fixed:
- Glitches in X11 keyboard handling, namely "stuck" Alt/Ctrl/Shift keys and invalid Ctrl+Space code.
- Sockets: behave in nonblocking mode under both Windows and Linux
- Assist++: constructor syntax "Arial()."

While under Windows XP building all the examples and all the references works fine, it is impossible to successfully build anything in a custom project directory, e. g. "D:\ProgWin\proj\upp".

MSC8 always yields:

D:\ProgWin\proj\upp\Core/Lang.h(107) : fatal error C1083: Cannot open include file: 'Lang_s.h': No such file or directory

MinWing always yields:

D:/ProgWin/proj/upp/Core/Lang.h:107:20: Lang_s.h: No such file or directory

"Package nests" reads:

D:\ProgWin\proj\upp;D:\ProgWin\upp\uppsrc

606-dev1 works fine.

Werner

D:\ProgWin\proj\upp;D:\ProgWin\upp\uppsrc

606-dev1 works fine.

Werner

*** CORRECTION ***

606-dev2 works fine!

The problem was caused by my somehow managing to copy some packages from the uppsrc assembly to the MyApps assembly.

I always intended to re-read "TheIde help / Packages, Assemblies & Nests" ...

Apologies to anybody who might have invested time in this issue.

Werner
