Hi,

Refer Skylark example 09.

```
SKYLARK(HomePage, "")
{
 Sql sql;
 sql * Select(ID, NAME, LASTNAME)
       .From(PERSON)
       .OrderBy(LASTNAME, NAME);
 ValueArray person;
 ValueMap vm;
 while(sql.Fetch(vm))
  person.Add(vm);
 http("PERSON", person)
     .RenderResult("Skylark09/index");
}
```

http("PERSON", person).RenderResult("Skylark09/index");
Here ValueArray table person is used.

I want to display second table data. How to pass it to http

I got the syntax in one of the Skylark example

it should be,

```
http
("PERSON", person)
("INFO",info)
("CARS",cars)
.RenderResult("Skylark09/index");
```
