it will look like :

this makes it possible to visually detect the absence of download.

the patch is in the next post.

Hello,

I am not sure about this change. The problem with it is that you can lose access to build...
Tomorrow macOs nigtly build will not be available. Screenshot below:

Sincerely,
Klugier

Hi Klugier,

Quote:I am not sure about this change. The problem with it is that you can lose access to build...
Each build is lost after 14 days with or without this patch.
this patch change only the presentation, it makes it possible to visually detect the absence of
download, and to know that tomorrow macOs nigtly build will not be available.
