Subject: Full recompile of single package only

Hi,

Sometimes when I change the layout of a class, theide does not correctly recompile all affected .cpp files when I just Build (F7).
I would like to force a full rebuild of my working package, however I can only see a button to do a full rebuild of all packages in the project (taking a few minutes). Is there a button for this somewhere?

Hello Maginor,
Quote:I would like to force a full rebuild of my working package, however I can only see a button to do a full rebuild of all packages in the project (taking a few minutes). Is there a button for this somewhere?

1) Right click on the package you want to rebuild (in theIDE's packages list, on the left).
2) Select "Clean Package" and/or "Build package" menu items.

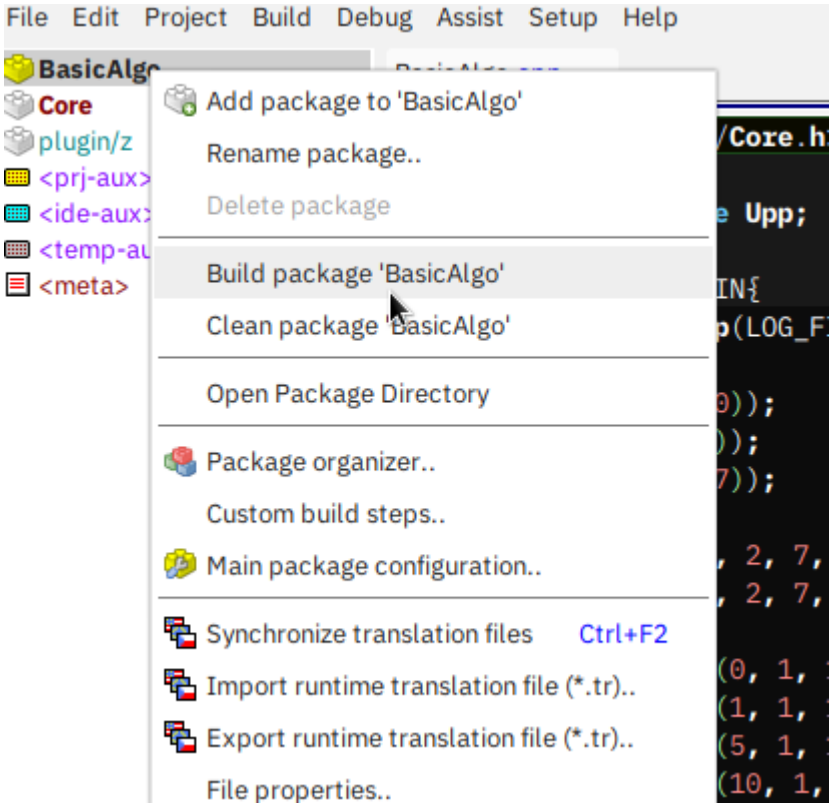

Screenshot:

Hope this helps.

Best regards,
Oblivion

Thank you!
Amazed that I didn't see that, as I certainly tried to look at some of the context menus
