
Subject: Assist does not work with local variables

Hello.

The IDE 14750 (and a few previous versions) does not show list of class members when typing '.' (or Ctrl+Space) after local variables.
For example:

```
struct MyApp : TopWindow {  
    Image im1;  
    MyApp() {  
        Image im2;  
        im1.Clear();  
        im2.
```

Assist works after typing "im1." but does not work after typing "im2."

Best regards.

Victor
