Hi everyone,

can you give me some short example Application, how to paint with Path aka.

w.Path("M50, 100 L400, 200 "); /// etc.

Just with Path. Nothing else.

Best regards

OK, I solved it like this.

```
#include <CtrlLib/CtrlLib.h>
```

```
using namespace Upp;
```

```
struct MyAppWindow : TopWindow
```

```
{  
    String s = "M100,200 C100,100 400,100 400,200";
```

```
    virtual void Paint(Draw& w)  
    {  
        DrawPainter sw(w, GetSize());  
        sw.Clear(SWhite());  
        sw.Path(s).Stroke(5, SBlack());  
    }
```

```
    MyAppWindow()  
    {  
        Title("My application").Zoomable().Sizeable();  
    }  
};
```

```
GUI_APP_MAIN
```

```
{  
    MyAppWindow app;  
    app.SetRect(0, 0, 200, 100);  
    app.Run();  
}
```

Realy simple.
