Great .
A question; Where is the cat picture?

A question; Where is the cat picture?

Lion (in PainterExamples) is technically a big cat, is not he?

Lion (in PainterExamples) is technically a big cat, is not he?
Mirek

Either way, Mirek is right: we have to get our butt in gear.
Usually, either we are shy and don't publish, or if we do, we don't proudly display the tools we use.

Note: Rating the article helps too. Just a bit, but does...

Hello Mirek,

You have my vote. The registration process for CodeProject is super easy - just authenticate using your GitHub account. It took me around 2 minutes. So, please support Mirek, he did outstanding job with these articles.

Now, if I have the account there I can start writing my own tutorials/articles...

Hello Mirek,

Out of curiosity - how hard from your perspective is to add support for this nice code coloring mechanisms we observe in code project? I think our internal documentation will gain a lot from it? We have CodeEditor that do the coloring job, so we need to connect it with T++ editor somehow...

Example below:

Klugier

File Attachments
1) CodeProjectFormating.png, downloaded 782 times

```
double ExpressionEvaluator::Term()
{ // resolve * /
    double y = Exponent();        // at least one member
    for(;;)
        if(p.Char('*'))
            y = y * Exponent();   // multiply by another member
        else
        if(p.Char('/'))
            y = y / Exponent();   // divide by another member
        else
            return y; // no more * / operators
}

double ExpressionEvaluator::Exponent()
{ // resolve power ^
    double y = Factor(); // at least one factor
    for(;;)
        if(p.Char('^'))
            y = pow(y, Factor()); // power by another factor
        else
            return y; // no more power ^ operators
}
```

Doable. I guess a couple of hours, maybe a day. Was not (is not?) a priority yet.

Hello Mirek,

Would be nice to have to polish our tutorials and internal articles. We have "code" style for the

very long time, so this featuer can wait

If you like it, do not also forget to vote here:

 https://www.codeproject.com/script/Surveys/Vote.aspx?srvid=2 296

(that would definitely help too...)

Hi Mirek,

Done voting.

But there is strange problem. Project link goes to page not found.

 https://www.codeproject.com/Articles/5268022/Getting-Started -with-Uplusplus-2020-1

Also When I use codeproject search for U++ it shows links for 5~6 U++ projects. Clicking on all
U++ links I am getting 404 response.

---

U++ links I am getting 404 response.

I think there was some temporary problem with Codeproject...
