Hi all, I find that the recent nightly builds of TheIde will quit unexpectedly in the following conditions:
1: run to cursor.
2: set breakpoint and run debug.
system used: win10, upp-win-14968, 14985

Many thanks!

Best Regards

Which compiler? clang or msc? 32 or 64 bits?

it should be clang, 64 bit

Thanks!

Caused by new version of ndisasm, rolled back... comitted to trunk.

There will probably be a delay in nightly builds due to technical issues (servr problems).

Mirek

Great fix, thank you. I was totally confused about this issue.
