Hello Koldo,

It seems that SysInfo GUI example has got problems with interface scalability. Could you check and verify. Screenshot attached (Comparing with TheIDE interface):

Operating system:
- Manjaro KDE

Hello Klugier

Thank you for the report. SysInfo_demoGUI does not play with font size or any other thing, so it seems it is a matter of how U++ interact with that OS.
I do not have any KDE box, but here there are two screenshots of W10...

Hello Koldo,

It seems that the issue is related to .NOGTK flag:

 mainconfig
     "" = "GUI .NOGTK",
     "" = "GUI .NOGTK NO_XTEST";

When you replace it with:

 mainconfig
     "" = "GUI",
     "" = "GUI NO_XTEST";

Then everything is OK.

I think X11 back-end is not well prepared for UI scaling. Here is the screenshot without .NOGTK
flag:

Thank you Klugier. NOGTK flag is now removed.
