2020.2 (October 2020)

Release highlights

- * This release is mostly about optimizations, using SIMD and multithreading.

Core

- * memset*, memcpy*, memeq*, memhash SIMD optimized inlined routines (* = 8, 16, 32, 64, 128)
- * String comparison is yet again optimized
- * Using 64 bit hashes on 64 bit CPUs

Draw, Painter

- * SIMD optimizations (Intel SSE2 and ARM NEON) of graphics related routines

ScatterDraw

- * Added SetDataSourceInternal() to internally host data

ScatterCtrl

- * Added ScatterWindowPool

Ide/umk - Android

- * Removed deprecated Android standard libraries (now select c++-static, c++_shared, system and none are supported)
- * Remove deprecated Android platforms (now armabi-v7, arm64-v8a, x86 and x86-64 are supported)

SQL

- * plugin/Sqlite3: Updated to 3.33

Core/SSH

- * Fixed a truncation issue with SshExec. It can now handle large outputs up to 2 GiB.

Turtle

- * Refactored to use VirtualGui

Ide/umk

- * C++ Assist parser in TheIDE is now multithreaded and some parts run in background
- * Navigator now can search for files too
- * The errors now can be directly googled
- * ide/umk now can be configured for cross-compilation (e.g. compile Win32 application in Linux)
- * Direct help button in "Select main package" window
- * Additional tooltips in various places for better user experience
- * Simplified project toolbar
- * Improved documentation

uppsrc

- * Improved support for OpenSolaris derived systems, FreeBSD and OpenBSD

upgrades of 3d party code

- * OpenSSL (in Win32 release) to 1.1.1g
- * plugin/jpg to 9d
- * plugin/tif to 4.1.0
- * plugin/lz4 to 1.9.2
- * plugin/zstd to 1.4.5
- * plugin/pcre to 8.44
- * plugin/sqlite3 to 3.33
- * plugin/glew to 2.2.0
- * plugin/Eigen to master branch commit C1D944DD (9/May/2020)

I think this is the success of whole community not only the Mirek. Every person who contributed to this release and to the past releases should be proud in the day like this. We do not forget about Upp veterans. Their spirit is still there. Mirek is a leader and a huge part of this project, but without simply bug report we will do not be in the place we are now. I won't mention the actual input of people who committed to the trunk or posted their patch.

So, I would like to thank Mirek for leadership and for the wide community support we received. You are doing awesome job!
