Hello,

My Manjaro-linux system upgraded Freetype2 to 2.10.4  
This gives me a linker error with 'FT\_Get\_X11\_Font\_Format' not being found.

This function seems deprecated (see <freetype2/freetype/ftfntfmt.h>), and should be replaced by 'FT\_Get\_Font\_Format'  
but doing so in Draw/FontFc.cpp does not help.

when I #include <freetype2/freetype/ftfntfmt.h> all seems ok again.

regards,

---

Hello wimpie,

Same was on Arch Linux. And this issue is hopefully resolved in 2020.2/rc1. (Trunk is working fine here).

See the message: [https://www.ultimatepp.org/forums/index.php?t=msg&th=11195&goto=55189&#msg\\_55189](https://www.ultimatepp.org/forums/index.php?t=msg&th=11195&goto=55189&#msg_55189)

Best regards,  
Oblivion

So i shouldn't have had these errors in the first place... I thought I was working with a recent U++ but it appears I messed up my local copy...

No worries, it happens sometimes.

Best regards,  
Oblivion

Hello wimpie,

Better is false alarm rather that we could miss something important. In this case it is critical issue that break compilation.

Klugier
