Hello,

I noticed that in latest releses plugin/Eigen has wierd directory structure.
Some folders are dubbed in the hierarchy.
For example, the same file Tensor.h can be found in 4 places:
- uppsrc/plugin/Eigen/Tensor.h
- uppsrc/plugin/Eigen/CXX11/src/Tensor/Tensor.h
- uppsrc/plugin/Eigen/Eigen/CXX11/src/Tensor/Tensor.h
- uppsrc/plugin/Eigen/unsupported/Eigen/CXX11/src/Tensor/Tenso r.h

Is this intended?

Best regards,
Victor

Still all 25 folders from uppsrc/plugin/Eigen/Eigen/src
are dubbed in uppsrc/plugin/Eigen/src

Is it OK?

Best regards.
Victor

Oh yes, it is part of the code.
The files at uppsrc/plugin/Eigen/Eigen basically include the files at uppsrc/plugin/Eigen/Eigen/src.
