Well, it might not be in the context you would expect, but anyway:

https://arstechnica.com/gaming/2020/10/how-indiana-jones-fou
ght-the-communists-and-led-an-era-of-activist-video-games/

Can you find it? :)

Mirek

Hello Mirek,

I found it, but I will not spoils the fun of others :) Great article and good to see how young Mirek looks like :) Of course the linking to the website is also valuable.

Klugier

8o That's quite a story, right there. I'm very happy to see bir of the background story of U++'s main developers. :)

You all certainly deserve a better place in this arena.

And Mirek, thank you, again, for all your efforts.

Best regards,
Oblivion

(Miroslav still writes code these day) :lol:

It is clear that the great work comes from afar. Hard times, but good times for forging young fighters... until today.

I still watch Indiana Jones movies.

I confess, I didn't read the article but "no spoil" is nice and I'm not much better these days :lol:

But Upp is still great work. I often think about it at work ... There is so much to do with it : simple and efficient (very efficient) :) ... but needs some C++ coding skills to use properly ... which isn't really what schools teach these days :(
maybe with java licensing issues growing, things will change
