
Subject: Layout editor reverting changes
Posted by [jimlef](#) on Sun, 25 Oct 2020 21:04:50 GMT
[View Forum Message](#) <> [Reply to Message](#)

Has anyone else noticed this? I've seen it in multiple versions from 2020.1 up to and including 15279 (running on Linux). It just happened again...

I have a layout with the line:

```
ITEM(Option, optProdTaxable, SetLabel(t_("Taxable?")).WantFocus(true).LeftPosZ(708, 60).TopPosZ(120, 16))
```

^^^^^^^^^^^^^^^^

everything compiles fine... However, after I change anything else in the layout (say adding a new one), then compile, it reverts that line to:

```
ITEM(Option, optProdTaxable, WantFocus(true).SetLabel(t_("Taxable?")).LeftPosZ(708, 60).TopPosZ(120, 16))
```

^^^^^^^^^^^^^^^^

which fails to compile with an /home/james/upp/MyApps/Invoices/Invoices.lay (49): error: no member named 'SetLabel' in 'Upp::Ctrl'

I switch it back to the first version, and all is well - until I make another change (forcing the saving of the layout file again).

Anyone else?

Jim

Looks like a bug in .usc. Looks like nobody ever used WantFocus in .lay until today

(I usually set it in the constructor, but that is of course no excuse, will fix it asap).

Hello,

I recently stumbled on it to (and it used to work)
Since I was only playing around I just reverted it to default value (so it disappears from the line) ...
and compiled again

So it may be a more general bug

I switch it back to the first version, and all is well - until I make another change (forcing the saving of the layout file again).

Anyone else?

Jim

Now looking at it, I believe that you must have edited .lay file in text editor to add WantFocus there. Is that correct?

Mirek

I did hand-edit the file, to correct a tab order error and to give the option control focus as a tab stop. Here's the resulting file, which I can't find an error in and which compiles correctly:

```
LAYOUT(InvoicesLayout, 460, 116)
END_LAYOUT
```

```
LAYOUT(CompanyInfoWindowLayout, 360, 279)
  ITEM(Label, dv___0, SetLabel(t_("Business Name")).SetFont(SansSerifZ(12)).LeftPosZ(20,
96).TopPosZ(16, 19))
  ITEM(Label, dv___1, SetLabel(t_("Owner")).SetFont(SansSerifZ(12)).LeftPosZ(20,
96).TopPosZ(40, 19))
  ITEM(Label, dv___2, SetLabel(t_("Address")).SetFont(SansSerifZ(12)).LeftPosZ(20,
96).TopPosZ(64, 19))
  ITEM(Label, dv___3, SetLabel(t_("City")).SetFont(SansSerifZ(12)).LeftPosZ(20, 96).TopPosZ(88,
19))
  ITEM(Label, dv___4, SetLabel(t_("State")).SetFont(SansSerifZ(12)).LeftPosZ(20,
96).TopPosZ(112, 19))
  ITEM(Label, dv___5, SetLabel(t_("Zip")).SetFont(SansSerifZ(12)).LeftPosZ(20,
96).TopPosZ(136, 19))
  ITEM(Label, dv___6, SetLabel(t_("Phone")).SetFont(SansSerifZ(12)).LeftPosZ(20,
96).TopPosZ(160, 19))

jimlef wrote on Tue, 27 October 2020 15:49I did hand-edit the file, to correct a tab order error and to give the option control focus as a tab stop.

Undestood. The problem there is that at the time theide did not knew about WantFocus, so did not place it in correct place, instead placing it at the start of the list as the best bet.

I have now edited .usc file which controls it and added WantFocus correctly.

I understand... it's a minor thing as as you say I can do a `optProdTaxable.WantFocus(true)` in code...
but better to keep theide and library all at the same level I think.
Thanks again

Actually, it is not hardwired in theide; special files with .usc extension control this. Check `CtrlLib/CtrlLib.usc` ... So it is to keep library and library at the same level

Mirek
