Hello,

I would like to inform you that I have added addtional section to our GUI tutorial related to internationalisation. You can find it here. I would be grateful for feedback.

Maybe the heading should be plural?

"Internationalizing applications"

and

Quote:
we will show how to create an application that will support multiple regions

Also maybe we should use "locales" instead.

And thank you for your efforts, nice job!

Best regards,
Oblivion

Hello Oblivion,

Thanks for the feedback! I improved the article for your suggestions.

Hi,

I think this section (or maybe the another new one following this one) is a good place to explain those tiny "Id" and "Ctx" buttons in the Layout designer...

Mirek
