Subject: SOLVED SetLabel issue
Posted by forlano on Wed, 25 Nov 2020 12:03:17 GMT

Hello,

today I have done a SVN checkout and with a previously working program the compiler began to complain about a lay file

C:\MyApps\Vega82/Vega.lay (882): error: no member named 'SetLabel' in 'Upp::Ctrl'

Am I done something wrong or the interface has changed and I need to fix it?

Thanks,
Luigi

EDIT: the situation is becoming worse... the lay file is not being correctly displayed. Now trying a fresh Upp install

EDIT 2: After a fresh install the problem disappeared. It seems the problem was caused by my svn client. :roll:
