Hi,

what means "for(;;)" ?

```
    dlg.number <=<= 10;
for(;;)
switch(dlg.Execute()) {
case IDOK:
    PromptOK(AsString(~dlg.number));
    break;
case IDCANCEL:
    return;
}
```

```
    double x = Mul(p);
for(;;)
if(p.Char('+'))
    x = x + Mul(p);
else
if(p.Char('-'))
    x = x - Mul(p);
else
    return x;
```

is something defined in U++ or C++?

thanks

Yes, it is an infinite loop like a while(true).

You have a discussion about it here.
