---

InfoCtrl x; //somewhere declared

Whenever I put this in my constructor

AddFrame(x);

I get the statusbar on the side of my window (like a sidebar)  
and not at the bottom where I want them.

BTW thanks a lot for all of your help. The answers are prompt  
and do solve my problems. My application is coming along nicely.  
(See attached)

You should use a StatusBar object instead of an InfoCtrl.

The HelloWorld example demonstrates how to add a StatusBar.

<http://www.arilect.com/upp/forum/index.php?t=msg&th=84&amp;start=0>

Hope this helps.

Victor
