There is no public declaration of the method SetConfigGroup.
It is just defined in App.cpp.

Could you fix that, please?

TIA

All platforms are broken:

/home/buildbot/worker/l-upp/build/uppsrc/urepo/RepoSync.cpp:418:2: error: use of undeclared
identifier 'console'

```
    console.Log("Done", Gray());
```

```
    ^
```

Not clear which change caused that.
