---

In last trunk: 15652

- 1 - Open TheIDE
- 2 - Select Clock exemple from examples assembly
- 3 - Click on File then select "Open main package"
- 4 - look for another assembly (reference by exemple)

Issue : The new selected assembly (step 4) is not showing up and the list of package stay lock in the first selected assembly.

This BUG has already been reported here :
