can I bind class membre functions to Esc and work with them?

ANY way is acceptable...

there was need for fast scripting language and embending into classes. Esc wont satisfy that(for now). Found very effective Lua language(www.lua.org) and Diluculum add-on for embending into classes(on the Lua wiki > AddOns).

This solved every problems....

Yes. See `ide/LayDes/EscLib.cpp` at the end is EscDraw.

However, Esc is not very fast...

What about adding lua as "plugin"? License seems to be OK....

Squirrel is not bad too... very similar to C++, with loose types and many bindings already done.
www.squirrel-lang.org

Ciao

Max

Yes. See `ide/LayDes/EscLib.cpp` at the end is `EscDraw`.

However, Esc is not very fast...

Has the location of this file changed? I would like to see an example as well.

Esc is not very fast... This message is a bit old, has the speed of Esc changed any?

Jeremy

Well, speed is relative. I guess it is fast enough for most scripting operations. I would say it might be a little bit faster than bash, definitely slower than python.
