It seems the complier worked no problem, but the linker is having issues with the following messages:

Linking has failed
lld-link: error: failed to write the output file: Permission denied
clang-10: error: unable to remove file: Permission denied
clang-10: error: linker command failed with exit code 1 (use -v to see invocation)

No line numbers or files are mentioned.

Any clues would be greatly appreciated. Thanks.

Hello Skypilot65,

this probleme must come from the fact you forgot to close the application you are trying to recreate (your_package.exe)

Kill your app process should resolve this probleme
