Hi all,

well... quite Lua, since my project implements an OO variant of Lua, which I call Ike.
Thanks to SWIG I made a binding of a subset of the Ultimate++ framework.
There is also an ide, wrote in Ike. it's still full of bugs, but does not crash too often

can be downloaded here

<https://drive.google.com/file/d/1PHnK7oRFngiongJiyaKdDatNFluWqZXZ/view?usp=sharing>

Let me thank Mirek and the whole Upp community, for the great software you made.

Paolo

...well it has some problems.
Now they say to me it works.

Hi pber,

I am interested in developing Upp applications using Lua.
Could you share again your work? The link you provided is no longer active.

Best regards.
