Ide now has rudimentary support for MarkDown - based on Oblivion code - basically DocEdit with preview...

Ah, this is really nice. :)

(Refinements are pending, by the way. I apologize for the delay. I am currently finalizing the winpty support for my terminal. Then I'll be free to focus on it).

However, I have noticed one thing: The font in the editor is not monospaced. Markdown format is best worked on with monospaced fonts:

If possible, we should make it monospaced.

Best regards,
Oblivion

This new feature is awesome, it's now possible to edit README from TheIDE.
Thanks Oblivion and Mirek !
