Subject: Issue with FileCopy() on LinuxMint

Hi,

On my Linux Mint system using FileCopy() pumps up the file time stamp by one hour on every copy.

Do you experience similar behavior?

Best regards,

Tom

Probably daylight saving time related? Or just GM / local time issue? (maybe the same thing).

Mirek

Hi,

I'm on UTC+2+DST = UTC+3 here, so it must be related to DST handling.

I experience the issue on my office computer. But what is strange is that I have the same version of Linux Mint running on the same VM platform here at home, but without any issues.

Well, I will need to check all time / DST related settings on my office computer to see if there is anything wrong that could explain the strange behavior.

Best regards,

Tom

Hi Mirek,

And thanks! It still works here at home. I will test it next week at the office and let you know then if there is any issues remaining.

Best regards,

Tom

Hi Mirek,

Thanks! It works now here at the office too. :)

Best regards,

Tom
