Hi,

How to configure a source file (.h .cpp) as read only "inside the ide"?

(purpose here is to prevent the file from being changed "unintentionally")

Thanks

it's not possible at the moment(Correct me if I'm wrong Mirek).

Personally I don't like this kind of feature (how many time I find myself trying to quickly edit a file to realise I can't and I need to do some extra step to add a simple console log). If it got implemented one day I hope it will be via a checkbox or something else that I can checkout to off and never ever configure it again

Hi,

(sorry) I didn't find it: this feature already exists in the menu file read only.

Thanks
