This should make StrDbl, StrInt, CParser::ReadInt, CParser::ReadDouble etc... about 60% faster.

/home/buildbot/worker/l-upp/build/uppsrc/Core/Convert.hpp:5:9: error: use of undeclared identifier 'BYTE'

```
    while((BYTE)*s <= ' ') s++;  
           ^
```

It was already very fast (at least compared to atoi())
This speed served me many times in my apps (to load huge text data files: 6 GB and more).

So this new optimisation will speed them up even more

Very goog news

Thanks
