Scatter is not installing properly, no elements are showing up in the folder that it is supposed to be in.
Are there any suggestions on how to fix this? I have git installed and other libraries are installing fine

Really weird, I have just tried to reinstall and it works.

I would try to hard-delete the Scatter folder from the UppHub. I suspect there might be problems with that (rights/readonly...). Then I would install again.

P.S.: Win32 release has git included (mingit in bin folder)...

I have also problems since the latest stable release in 2021.
Especially with the Format functions specific to types.
Eigen is well installed.

Can somebody check ?
It was a so wonderfull project !

Happy to help, but you have to be much more specific than that...

At minimum, you can try to post a copy of error messages (if that is the problem).
