Is it possible to add Next/Previous Frame keyboard shortcuts to TheIDE for keyboard-only guys?

TIA.

Hello Novo,

As far as I remember you do not use TheIDE for development :) So, what cause this change?

Klugier

I use TheIDE for debugging. Actually, for checking of a call-stack in case of an assert.

I use a lot of weird stuff, like VIM, Linux, manual tiling window managers, split 40% keyboards, e.t.c.
