hi,
i am trying to compile this simple code

#include "helloCurl.h"
#include <curl_x86-windows/include/curl/curl.h>

helloCurl::helloCurl()
{
 CtrlLayout(*this, "Window title");

 CURL *curl;
 CURLcode res;

 curl = curl_easy_init();

}

GUI_APP_MAIN
{
 helloCurl().Run();
}

but always get this error :

 (): lld-link: error: undefined symbol: __declspec(dllimport) curl_easy_init

what im doing wrong ?
and what i have to do it right ?

thx

gabriele

I guess you are not linking your app against a library containing code of a function curl_easy_init.

i am trying as you can see in the png attached
but didnt work and the error is the same
what i am doing wrong ?
thx

EDIT 1
correct link to .a library and now build process go on
but now im stuck with ldap dependancy
thx btw
