

Hi,

In the process of learning Ultimate++ I'm trying to make a small GUI tool to resize images. I studied the tutorials/examples and search the forum and managed to load the images I want to resize in ColumnList, but I have two problems so far:

1- Some .jpg images don't open even with the ImageView example, but they open fine with the Thelde & the IconDes including its Filesel Preview (& its WhenIconLazy after i removed the .icon size restriction).

2- The images loading/showing is so slow, I think the bottleneck happens when the Stream is converted back to Image.

The code I come up with:

```
void imageresizer::openimages(){  
  
    if(!fs.ExecuteOpen()) return;  
  
    int fslen = fs.GetCount();  
  
    work.Run([=] {  
  
        for(int i =0; i < fslen ; i++) {  
  
            String fn = fs[i];  
  
            Image img = StreamRaster::LoadFileAny(fn);  
  
            GuiLock __;  
  
            if(IsNull(img)) {  
  
                Exclamation(DeQtfn(fn) + " not an image.");  
  
            }  
  
            else {  
  
                ClmList.Add(i, img, true);  
  
            }  
  
        }  
  
    });  
  
}
```

```
}  
}  
  
});  
  
}
```

I would appreciate any help or guidance.

Thanks you
Austin2029

    if(!fs.ExecuteOpen()) return;  
  
    int fslen = fs.GetCount();  
  
    work.Run([=] {  
  
        for(int i =0; i < fslen ; i++) {  
  
            String fn = fs[i];
```

```

Image img = StreamRaster::LoadFileAny(fn);

GuiLock __;

if(IsNull(img)) {

    Exclamation(DeQtfn(fn) + " not an image.");

}

else {

    ClmList.Add(i, img, true);

}

});

}

```

I would appreciate any help or guidance.

Thanks you
Austin2029

Code seems fine.

Generally, loading especially high resolution .jpgs can be somewhat slow (we are victims of jpg library we are using here). I usually solve the problem with delayed loads / displays (which in general is not trivial to implement).

Can you upload some examples of .jpgs not loading in ImageView?

Hi,

I tried ImageView on (ubuntu-budgie-21.04) and the images I have problem opening on Windows 10 are showing fine (A sample image is attached).

Is it possible to implement some way to take advantage of ThumbCache? I think that would

speedup FileSel icon previews & can be used in applications like what I'm trying to make.

Thank you!

Hi,

I just noticed that those images open With the Code above (Not with ImageView thou) if I put them directly on any drive (C:\sample.jpg) for example. It takes for ever to open just one if it's on any usb drive.

Eidt:

They open if I put them in a drive if I use FileSelNative, they still don't open with FileSel.

I just figured out that the problem is the build "CLANG/CLANGx64", I changed it to "MSVS19x64" and now all my images open with my code and ImageView example.
Not sure what's the exact cause, but I'll stick with MSVS19x64 for now.

Not sure what's the exact cause, but I'll stick with MSVS19x64 for now.

Thank you.

I have tracked the problem down to the bug in clang64 toolchain (reported here: <https://github.com/mstorsjo/llvm-mingw/issues/242>)

For now, it is fixed by increasing allocation limit for plugin/jpg. If you do not want to reinstall U++,

you can fix that by adding

```
#define DEFAULT_MAX_MEM 1024*1024*256
```

at the start of plugin/jpg/lib/jconfig.h
