What is the difference between

```
VectorMap<int, String> vm;
```

```
...  
for(const auto& m : vm) ...
```

and

```
VectorMap<int, String> vm;
```

```
...  
for(const auto& m : ~vm) ...
```

1. Enumarates the values in the vm.
2. Enumaretes the key-value pairs in the vm (as KeyValueRef struct - a very handy feature!)?

:)

Best regards,
Oblivion

Correct. There is also a slight difference with handling Unlinked items - first variant includes them, second one skips them.

The number 2 is clever ! I can't count how many time I did this:

```
for(const auto& m : vm.GetKeys())
```

```
...
```
