Hello,

I would like to wish you all the best in upcoming 2022! It was tough year for us all, however during it U++ received new update - 2021.1. I hope the upcoming year will be equally successful in this matter :)

If you celebrate Christmas - now or at the begging of the new year, I wish you and your family members Merry Christmas. During that time we are all U++ family, even if we disagree in some cases.

In the latest version of U++ in RichTextView/RichTextEdit you could display all fancies emojis I used in this post! This is Mirek's present for the community ;) One more time, all the best in 2022 and Merry Christmas!

Klugier
