Subject: Adding void ArrayCtrl::SetLineTextColor(int i, Color c);

Hi,

I added "ArrayCtrl::SetLineTextColor(int i, Color c)" in order to allow setting the text color for specific ArrayCtrl lines. (This is useful for showing special status of specific items.) The small changes required are included in the attached ArrayCtrl.h and ArrayCtrl.cpp.

Any chance to merge?

Best regards,

Tom

I am doing this using AttrText. Any reason not to?

Hi,

Thanks for the suggestion. I never knew about AttrText. It was a bit complicated to get everything working, as reading the string back from the cell requires extra steps, but I finally got it working.

Thanks and best regards,

Tom
